DETAILED ACTION

Response to Arguments

Applicant's arguments filed 2/13/09 have been fully considered but they are not persuasive. Applicant argues that Best does not provide a deformable layer between the light incident substrate and the photosensitive layer. However, as shown in Embodiment 2, the "subbing" layer and "deformable" layer are formed of the same materials, i.e. both are deformable.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-23, 33 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,510,164.

The reference discloses a recording medium comprising a tellurium based recording layer (photosensitive layer) where the recording layer has a subbing layer between the light incident substrate and the recording layer and a deformable layer between the recording layer and a hard coat (second substrate). The subbing layer and deformable layer may be formed of the same materials (fluorinated hydrocarbon or silicone). The layers provide plastic/elastic deformation. See Embodiment 2. Further, a metal layer may be provided between the recording layer and the

Application/Control Number: 10/561,832 Page 3

Art Unit: 1794

hard coat. The reference does not specify the thickness of the subbing and deformable layers. However, it would have been obvious to one of ordinary skill in the art to vary the thickness of each layer in the interest of optimizing their properties and optimizing production costs.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 24-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,510,164 in view of US 6,544,616.

The '164 reference discloses the medium as described in the above rejection. It is recognized that the reference does not provide a teaching for a dual-layer single-sided medium. i.e. a medium having a semi-transparent and reflective layer which is read form a single side. However, the '616 reference shows that it is known to utilize multi-layered disks comprising patterned semi-transparent and patterned reflective layers for increasing the storage capacity. Further, the multiple layers are provided with multiple protective layers, i.e. multiple recording layers would require multiple deformation layers.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1794

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth E. Mulvaney whose telephone number is 571-272-1527. The examiner can normally be reached on Monday-Friday 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
